IMAGINE
WINDOWS, NOT WALLS

At Eternia, we believe that a window is more than just a view—it's a gateway to boundless possibilities. Our purpose is to inspire high-quality living by transforming spaces into places of comfort, beauty, and inspiration. Designed with expressive innovators in mind, our windows redefine the home experience, connecting seamlessly with the aspirations of homeowners who seek spaces that rejuvenate and inspire. Whether you're an entrepreneur, artist, or nature lover, Eternia's windows create an open, breathable

sanctuary that reflects your individuality and maximizes your living environment. Our sleek designs and patented materials, combined with certified performance, offer both function and elegance. With an array of colors and a commitment to hassle-free service, we ensure that every window seamlessly integrates with your lifestyle. At Eternia, we're not just crafting windows; we're helping you realize the dream of a home that feels open, unbounded, and truly yours—a space where walls no longer inhibit, and where windows empower.

HOW WINDOWS SHAPE YOUR SPACES

Windows do more than frame a view—they shape how your space feels. With Eternia, each window opens up light, style, and a seamless connection to the outdoors, turning your home into a refreshing, open sanctuary.

Ventilation and Light

Windows are essential in bringing natural light and fresh air into a space. Thoughtfully designed windows allow daylight to penetrate deeply into interiors, reducing the need for artificial lighting and creating a bright, airy atmosphere. They provide natural ventilation, enhancing comfort and air quality, making each space feel open and invigorated.

Aesthetics & Views

Windows are the canvas that bring the outside in. By framing scenic views and connecting us to our surroundings, they elevate the experience of every room. A well-placed window isn't just functional; it's a design element that enhances both interior and exterior aesthetics, adding character and style to a home.

Protection from the Elements

Eterna windows are designed to withstand extreme weather conditions, providing a secure barrier against strong winds and preventing water seepage, even during heavy rains. With high performance against wind, water, and air, these windows ensure your home stays protected and dry, offering peace of mind and resilience in the face of challenging weather.

Noise Insulation

Windows can create a serene indoor environment by reducing noise from the outside world. With acoustic insulation properties, specially designed windows block unwanted sounds, ensuring a quieter, more peaceful atmosphere within. Double-glazed windows are particularly effective in providing a buffer from external noise, adding to overall comfort.

Safety & Security

Windows are crafted with more than just beauty in mind—they're designed to keep your home safe. Reinforced frames, secure locking systems, and shatter-resistant options ensure peace of mind, protecting against potential break-ins while maintaining the elegance of each space.

Energy Efficiency

Energy-efficient windows optimize home comfort and reduce energy costs. Advanced glazing and well-designed frames limit heat transfer, helping to maintain an ideal temperature indoors. By lowering the need for heating and cooling, energy-efficient windows support both sustainability and cost savings, enhancing the well-being of residents.

ADITYA BIRLA GROUP

THE ADITYA BIRLA GROUP

A FORCE FOR GOOD

A legacy of over 150 years that has enriched lives by building highly dynamic yet responsible businesses and institutions that have inspired trust across the globe.

Clear Perspectives:

Glass options

A comprehensive range of glass options to meet the highest standards of performance, aesthetics and functionality. Choose from a variety of options offering unique benefits such as thermal insulation, noise reduction and UV protection, to enhance comfort, safety and beauty of your projects.

Toughened

Heat-treated for extra strength and safety, ideal for high-impact resistance.

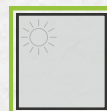

Frosted:

Translucent finish for privacy while allowing soft, diffused light.

Double glazed:

Two glass panes with an insulating air layer for improved thermal efficiency.

Tinted :

Reduces glare and heat, adding a subtle color tint for solar control.

Laminated:

Two glass layers bonded with a plastic film, offering enhanced safety and sound insulation.

Acoustic laminated:

Acoustic laminated glass features a sound-dampening layer that reduces noise infiltration, creating a quieter indoor space.

Double Glazed Laminated:

Combines the benefits of double glazing with laminated safety for maximum insulation and security

Switch Glass:

Smart glass that changes from clear to opaque at the flick of a switch for instant privacy.

Frame Your World in Style:

Discover Our Palette of Possibilities

Transform your space with our exclusive range of aluminum window frames, available in a spectrum of stunning colors and finishes. From classic wood grains to contemporary hues, our windows offer the perfect blend of style and durability. Each color option is designed to enhance your home's aesthetic while providing unmatched performance and stability. Whether you prefer a bold statement or a subtle touch, our window frames are crafted to reflect your unique taste. Choose the perfect shade and let your windows make a lasting impression.

THE ANCILLARY RANGE

The ancillary range enhances your living spaces with innovative solutions such as frameless railings, pleated pest mesh, and integrated glass railings. This collection seamlessly integrates with your existing windows, offering both functional and aesthetic benefits.

Eternia Essentials Frameless Railing

The Eternia Frameless Railing offers a sleek, modern design that maximizes unobstructed views and enhances the aesthetic of any space. With its minimalist profile, this railing solution blends seamlessly into your surroundings, providing safety and style without the visual interruption of traditional frames.

PRODUCT SPECIFICATIONS

Railing height: 1000mm

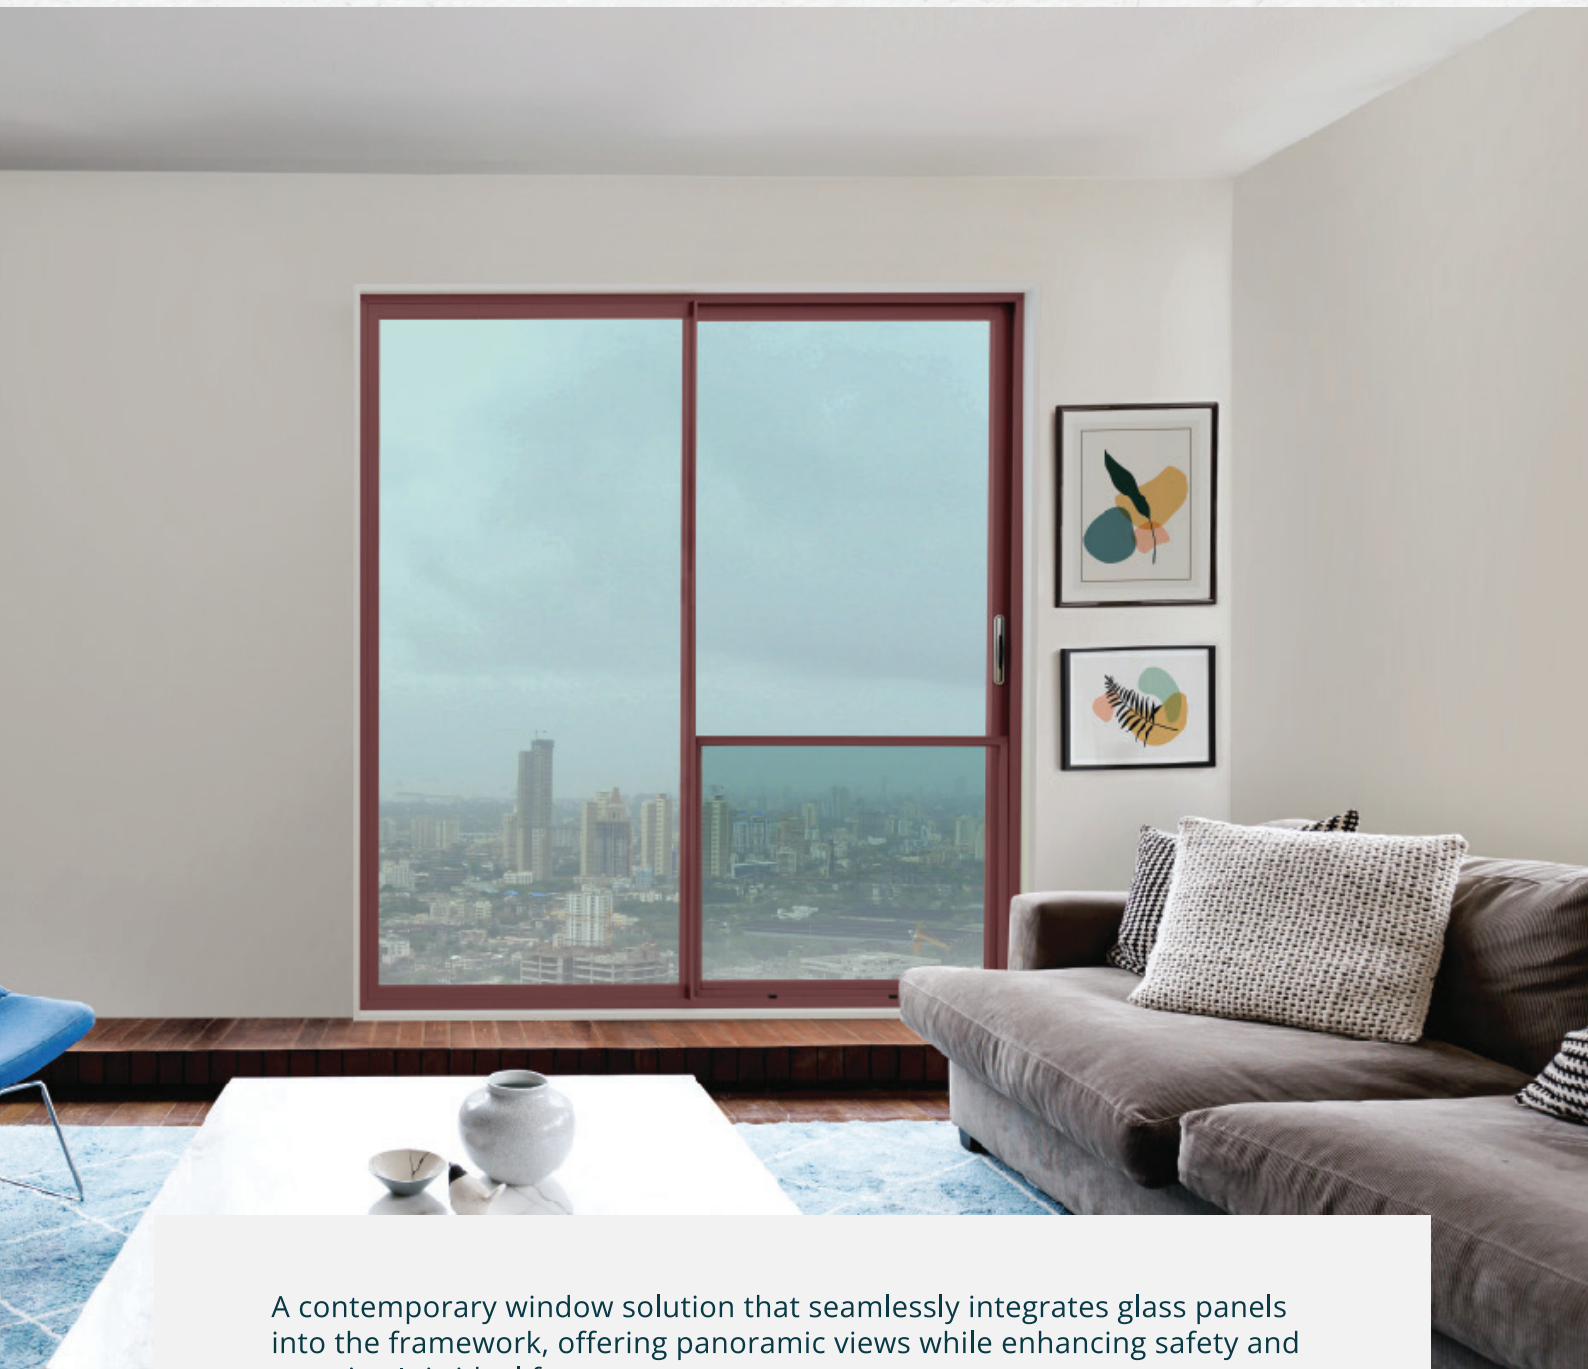

Glass Thickness: 15.52 to 17.52mm

Integrated Pleated Mesh

Add an extra layer of safety without compromising on the beauty. A compact and cost effective solution to keep insects out. The integrated design adds to the aesthetics of the space, while ensuring effortless opening and closing.

Integrated Glass Railing

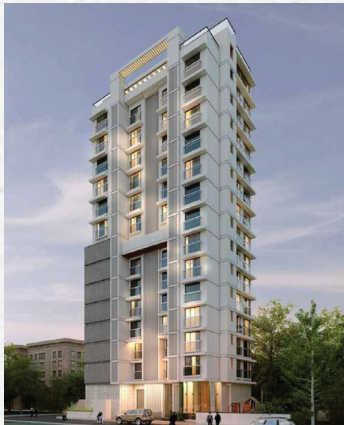

A contemporary window solution that seamlessly integrates glass panels into the framework, offering panoramic views while enhancing safety and security. It is ideal for compact spaces.
